CATS

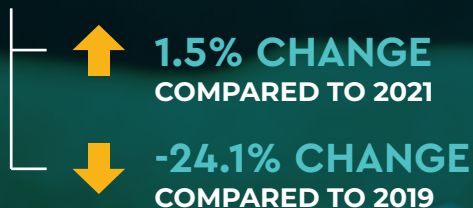

DOGS

# OUTCOMES

## TOTAL OUTCOMES

## LIVE OUTCOMES

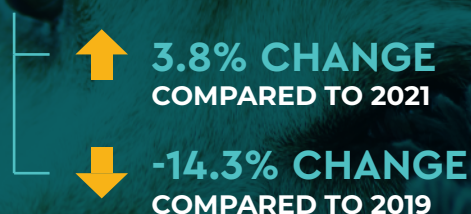

## NON-LIVE OUTCOMES

## TOTAL ADOPTIONS

## CAT ADOPTIONS

## DOG ADOPTIONS

## PBC

The SAC Population Balance Calculation (PBC) is the formula used to determine if a shelter's population is increasing, decreasing, or staying the same. It simply takes the total outcomes divided by the total intakes for a time period. 100% means the animals are leaving at the exact same rate they are coming in. Below 100% means the population is increasing and above 100% means the population is decreasing.

2019	2020	2021	2022
94.9%	98.4%	93.1%	93.5%
